

Take Offs and Landings: Preventing an Accident

Woody spoke to us in January and I had so much good feedback, I asked him back. This time Woody will talk to us about that most important part of flying.....that being take offs and landings.

The take off and landing part of flying combines all our flying skills and compacts it into about 30 seconds. The leading cause of accidents is in the takeoff and landing phase. Learn why these accidents occur, how to become more proficient, and how to reduce the chance of being an accident statistic.

Directions: This seminar will be located in the Modern Avionics Hanger.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
